# RACH, Aluminium Hollow Plunger Cylinders

▼ Shown from left to right: RACH-1504, RACH-15010, RACH-206, RACH-306

· Hollow plunger design allows for both pull and push forces

Composite bearings increase cylinder life and sideload

Steel base plate and saddle for protection against load-

Integral stop ring prevents plunger over-travel and is

· High strength return spring for rapid cylinder retraction.

capable of withstanding the full cylinder capacity

Hard-Coat finish on all surfaces resists damage and

. Floating center tube increases seal and product life

# The Lightweight Solution for Tensioning and Testing

### Saddles

All RACH-cylinders are equipped with bolt-on hollow removable saddles of hardened steel.

#### Lightweight Hand Pumps

The Enerpac composite lightweight hand pumps P-392 or P-802 make the optimal lightweight set.

### Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system,

specify only Enerpac hydraulic hoses.

# Single-Acting, Aluminium Hollow Plunger Cylinders

Aluminium versus Steel
Aluminium cylinders,
while offering the most
lightweight solution, also have some
unique limitations due to material
properties. It differs from steel in
that it has a lower finite fatigue life.
Aluminium cylinders should NOT be
used in high-cycle applications such

as production.

The Enerpac line of aluminium cylinders are designed to provide 5000 cycles at their recommended pressure. This limit should not be exceeded. In normal lifting and many maintenance applications, this should provide a lifetime of use.

## RACH Series

Capacity:

20 - 100 ton

Stroke

50 - 150 mm

Center Hole Diameter:

27 - 79 mm

Maximum Operating Pressure:

700 bar

В

#### Steel Base Plate

The steel base plate protects the cylinder from damage, it should not be removed.

The base holes in these aluminium cylinders are designed for securing the steel base plate. They will not withstand the capacity of the cylinder.

Do not use the base holes in these aluminium cylinders to attach any device to the cylinder.

| Steel Base Plate Mounting Holes |                     |             |                         |  |  |  |  |
|---------------------------------|---------------------|-------------|-------------------------|--|--|--|--|
| Cylinder<br>Model /<br>Capacity | Bolt<br>Circle<br>U | Thread<br>V | Thread<br>Depth 1)<br>Z |  |  |  |  |
| ton                             | (mm)                | (mm)        | (mm)                    |  |  |  |  |
| RACH-20                         | 80                  | M6          | 12                      |  |  |  |  |
| RACH-30                         | 110                 | M6          | 12                      |  |  |  |  |
| RACH-60                         | 160                 | M6          | 12                      |  |  |  |  |
| RACH-100                        | 230                 | M6          | 12                      |  |  |  |  |

<sup>&</sup>lt;sup>1)</sup> Including Base Plate Height of 6 mm and four (4) base plate bolts M6.

# A I

#### **Standard Features**

- CR-400 coupler and dustcap included on all models.
- All cylinders meet ASME B-30.1 and ISO 10100 standards.
